

LGR218 Single Drum Vibratory Roller(Mechanical Transmission)

LGR218 vibratory roller adopts mechanical travel drive, double amplitude, hydraulic vibration and steering .The standard configurations employ the reliable. D6114ZG engine with easy accessibility for repair and maintenance. Two sets of brake devices, a hand brake and a foot pedal brake, assure the machine's safety and dependability. World advanced technology is adopted for the hydraulic vibration technology, high in reliability, simple and convenient in maintenance, and low in cost.
